

Maple Grove · fictional value-add

Illustrative Midwest property · 20 residential units · 5-year hold · Generated 10/9/2026, 9:23:06 PM (Central Time)

Use your browser's print destination "Save as PDF". Landscape orientation is recommended for the annual tables.

Origin: fictional example; edits and copies retain this origin. Figures are illustrative, not verified property information.

Purchase price

\$2,800,000

What you pay for the property, before closing costs.

\$1,214,200

Cash you put in at closing: price, closing costs, initial CapEx and loan fees, less the loan.

\$254,732

Rent and other income less operating costs. Excludes loan payments, reserves and CapEx.

1.95x

NOI divided by yearly loan payments. Above 1.0x, income covers the loan.

8.88%

First-year cash flow after loan payments, reserves and CapEx, divided by the cash you put in. Excludes the sale.

14.17%

Your yearly return including the sale, counting when cash goes in and comes out.

1.78x

All cash returned to you divided by all cash you put in.

\$1,504,030

Cash left from the sale after selling costs and paying off the loan.

\$318,862

NOI for the year after your hold; the sale price is based on it.

\$3,279,610

Forward NOI divided by the exit cap rate.

\$1,214,200

All cash you put in, including any extra needed after closing.

\$2,161,675

All cash paid out to you, including the sale.

10.83%

Average yearly operating cash flow divided by the cash invested.

\$397,619

Sale value above the purchase price, after selling costs. Not a tax calculation.

Key assumptions

Income mode: manual stabilized · Monthly residential rent: \$1,900 (per unit) · Other monthly income: \$850 · Economic vacancy: 5.00% · Credit loss: 1.00% · Concessions: 0.50%.

Annual growth: rent 4.00%, other income 2.00%, expenses 2.50%. Reserves: \$300 per unit annually; annual CapEx \$10,000. Initial CapEx \$160,000; closing costs \$56,000.

Loan \$1,820,000 (65.00% LTV); nominal rate 6.00%; 30-year amortization; 10-year maturity; 0 interest-only months; origination fee 1.00%. Initial monthly payment \$10,911.82. Exit cap rate 9.72%; selling costs 2.50%.

Financing summary

Yearly totals from the monthly debt schedule. Monthly rows can be exported separately.

Year	Debt service	Interest	Principal paid	Ending balance	Balloon due	DSCR
1	\$130,942	\$108,592	\$22,350	\$1,797,650	\$0	1.95x
2	\$130,942	\$107,214	\$23,728	\$1,773,922	\$0	2.04x
3	\$130,942	\$105,750	\$25,192	\$1,748,730	\$0	2.13x
4	\$130,942	\$104,196	\$26,746	\$1,721,984	\$0	2.23x
5	\$130,942	\$102,547	\$28,395	\$1,693,589	\$0	2.33x

Income-to-cash-flow bridge

Year 1 · NOI excludes financing and capital. Debt service already includes scheduled principal. Excludes sale, financing receipts, balloons and distributions.

— Cash flow step

Capital recovery timeline

Includes additional contributions from negative operating cash flow. Net sale proceeds are separate from operating distributions, after selling costs and loan payoff. Nominal recovery does not account for the time value of money.

— Contributed / as-of equity --- Cumulative operating distributions ... Net sale proceeds

Sensitivity tornado

One assumption at a time; change in annual IRR from the current base, in percentage points (pp). Rent/cost $\pm 10\%$; vacancy/cap/rate ± 0.5 pp. Invalid or unsupported cases are N/A, never forced to a target.

Scenario comparison

Hypothetical scenarios · other assumptions inherit the current base case

Base case

14.17%

Annual IRR	
Rent growth	4.00%
Vacancy	5.00%
Exit cap rate	9.72%
Expense growth	2.50%
Equity multiple	1.78x
Exit-year NOI	\$304,920
Initial equity	\$1,214,200

Upside

21.16%

Annual IRR	
Rent growth	5.00%
Vacancy	3.00%
Exit cap rate	9.22%
Expense growth	2.00%
Equity multiple	2.33x
Exit-year NOI	\$335,651
Initial equity	\$1,214,200

Downside

4.67%

Annual IRR	
Rent growth	3.00%
Vacancy	8.00%
Exit cap rate	10.22%
Expense growth	3.50%
Equity multiple	1.22x
Exit-year NOI	\$268,833
Initial equity	\$1,214,200

Financial conventions and limitations

Annual IRR uses equally spaced annual owner cash flows. Monthly planner XIRR uses actual dates and monthly distributions; its return can differ because of cash-flow timing. Unsupported or ambiguous returns remain unavailable.

NOI excludes financing, reserves and capital expenditure. Regular debt service includes scheduled principal. Sale proceeds deduct selling costs and loan payoff once; negative operating cash flow requires additional owner equity.

Returns rely on entered assumptions and do not verify property income, market value, lender terms or tax treatment. Review the calculation warnings and reconcile source documents before relying on results. The in-app methodology describes the full conventions.
